Again I say I remember when Windows first came out I have a copy of that program. I am thankful for Microsoft other wise we would still be using DOS. Microsoft owns Windows and should not have to give away their codes to help other sofeware company s. They invented it and should have all the rights to it. Just like Henry Ford and Alexander G. Bell look at AT&T now since they were told to give away the store. We all are worse off than we were years ago. Let Microsoft do it s thing and make it better without interference. I back Microsoft all the way leave them alone they have a vision of the future in using computers and let them proceed. Maybe the stock market will go up again it went down when they got sued remember. Thank you D.Atwood
